Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it contains legal phraseology. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Prood.

There is disclosed in Prood a cooking apparatus, comprising: a rack (support grid); and a pan (D) supported by the rack.

Claims 1, 5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Myler et al.

There is disclosed in Myler a cooking apparatus, comprising: a rack, the rack including a frame having base members 22, 22' and rungs (cross bars) 30, 30' connected to the base members.

Claims 11 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by More.

There is disclosed in More a cooking device, comprising: a rack 20; a pan 30 supported by the rack; a grill (cooking oven) having a surface (side walls) which carries the rack and the pan; a spit; means 18 for rotating the spit and a heating element 9, 12 in spaced relation to the spit.

In regards to the use of the device as a basting apparatus, there is provided no structure in the claims to differentiate the claimed apparatus from the prior art apparatus satisfying the claimed structural limitations.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 7, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prood in view of Ward et al.

Ward discloses an adjustable rack (grid) having plural interior bars and plural exterior bars fitting telescopically over the plural interior bars. It would have been obvious to one skilled in the art to substitute the rack (grid) of Prood with that disclosed in Ward, in order to allow use of the rack in various sized ovens.

***Allowable Subject Matter***

Claims 6, 12 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Glassmeyer and McCaughey are cited for their disclosure of a basting apparatus having a grill supporting a rack and pan arrangement. The patent to Dikeman is cited for its disclosure of an adjustable rack.
